Supervision: **Nancy Ocampo**
Art Concept: **Antonio Muñohierro + Francisco Fernandez "El Taka", Iván Krassoievitch, Ximena Labra.**
Art Production: **Juan Camara, Mariana Fernandez, Polo Castellanos**

A space conceived to dignify the musical expressions. This project has been executed together with OCESA, Mexico's leading company in the entertainment industry. Taking its inspiration from the time period that gave rise to the building, the 50's, the transition from modernism to post-modernism, it reclaims the value of functionality and applies it to the present time. This project pays homage to music and the cultural expressions that surround it.

and basement. Presently the ground floor has a lobby area, bar, coat room, kitchen, storage rooms, restrooms, and a stage with its backstage dressing rooms and bathrooms. Followed by the house offices, more storage rooms and restrooms, and multiple halls. The existing area measures 17,060 squared feet and can host up to 1,500 viewers.

Our participation begins at the building's outdoor lobby access, by creating three different volumes on the façade– from ticket sales, reception to elevators, and souvenir shop – directly into two corridors which lead to the building's entrance. The finishes chosen are what dress and articulate the interior of the project, setting a rhythm on the walls with wood wainscoting, which starts on the exterior and travels all the way through the concert hall..
