Every year, *AN Interior* s editors assemble our Top 50 List. This grouping recognizes the most outstanding North American architecture and design firms working in interiors. On the following pages, emerging practitioners rub shoulders with established firms, giving readers a sense of the exciting breadth and depth of work shaking up interior architecture today. Our research considered diversity across its many dimensions. The designers, studios, firms, and practices contained here operate in a variety of styles, specialize in a range of typologies,

and respond to clients across the continent and planet. Each is motivated by design excellence and understands the holistic importance of creating space through the skillful arrangement of materials, objects, and activities. Interiors are where we live, work, and play, so elevating the quality of these spaces is critical. As always, our Top 50 list identifies those in pursuit of delivering better buildings and better lives for the people who use them.
